Signed By: billy.short@navy.mil

And I see no required changes in the SOW. The deliverables listed in the full proposal can be truncated into the standard monthly reports and the final report, with the content as modified in the CDRL. .

Also, with the dissolution of ONR30, I have begun the migration to the 33 folder directory. I moved this project folder to:

R:\S & T\33\33\331\Short\Project Files\Core\PSU-ARL - AI for Tactical Logistics

Good Morning,

Do you have an estimate for when the updated CDRLS will be available? We would like to send the award package to legal, and will need the revised version to put in for review.

Good Morning,

That's fine. As long as we can get all our oars rowing in the same direction.

If you could please update the CDRLS so that the final report is explicit for the data you wish to receive, and also let me know if the Statement of Work needs to be scrubbed for this miscellaneous data.

I have cc'd Sean Palmer, my contracting officer, in case I missed anything.

Michelle, just following up on this. I'd prefer the proposed deliverables below to be elements of the final report versus rigid dates that may be hard to meet with the nature of this research? Can we just update the Final Report CDRL to add the required document elements from below?

It looks like Tom Fu signed off in CORT.

Michelle, is there any way we can make them requested elements in the final report vs. separate deliverables?

Good Morning,

Attached is the copy of the CDRLS I currently have; however, I noticed in the Technical Proposal a list of deliverables. I have copied them below:

- Tactical Logistics Ontology prepared in Terse RDF Triple Language (Turtle) format – 9 months ARO
- Models for query templates and impact templates in Terse RDF Triple Language (Turtle)format – 9 months ARO
- Briefing summarizing the tactical logistics ontology in the BKA – MS PowerPoint - 9 months ARO
- Report summarizing tactical logistics planning requirements for AAR– MS Word - 15 months ARO
- Report summarizing logistics demand services – MS Word - 21 months ARO
- Report summarizing the interface design between TSOA and ACS – MS Word - 24 months ARO
- Report summarizing distributed logistics ledger in DIL environment – MS Word - 12 months ARO

From what I can tell, it appears that these are data deliverables. If so, could you please create CDRLs for them? If they are not data deliverables, please let me know so I may include them in Section B of the award to ensure their delivery.

Thank you!
